DETAILED ACTION

1. This action is responsive to amendment filed 01/23/2006.
2. Claims 1-58 are pending in the application.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Lutz on 3/31/06.

The application has been amended as follows:

Claim 39 (currently Amended) The article of manufacture of claim 25 (15), wherein computing the color value comprises:

Allowable Subject Matter

4. Claims 1-58 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach computing the color value for the point using an importance sampling estimator for a reflected radiance integral; where the importance sampling estimator selects a plurality of ray samples for evaluation of the reflected radiance integral at the point P to generate the color value where ray sample directions are chosen according to information obtained from at least a light source term and a bi-

directional reflectance distribution function (BRDF) term of the reflected radiance integral.

The prior art does not teach dividing an interval into a plurality of sub-intervals according to the non-overlapping regions such that a length of each respective sub-interval is equal to a normalized weight of the non-overlapping region used to form the sub-interval; selecting a random point X,Y from a unit square; determining a sub-interval containing the X-component of the selected point; mapping the point to the unit square according to a length of the sub-interval; and mapping the point from the unit square to a non-overlapping region corresponding to the determined sub-interval. Selecting a direction to be used as a free parameter of the BRDF term; selecting a direction that is subtended by the selected spherical triangle; computing a product of a value of the BRDF term for the selected free parameter direction times a value of the environment map in the selected direction from the spherical triangle.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimbinh T. Nguyen whose telephone number is (571) 272-7644. The examiner can normally be reached on Monday to Thursday from 7:00
